

Finnish Forest Sector Economic Outlook

2003–2004

December 2003

Finnish Forest Sector Economic Outlook

The Finnish Forest Sector Economic Outlook is an annual publication on the business cycles of Finland's forest industry and forestry activities. It gives an overview of recent developments and includes forecasts for export volumes and prices, roundwood consumption and prices, employment, and investment in private forestry. In addition, the Economic Outlook contains a few short articles on topical matters in the forest sector.

The Economic Outlook has been published in Finnish since 1991, and in English since 1998. The English version is published in PDF format on the Internet. It is produced at the Vantaa Research Centre of the Finnish Forest Research Institute (METLA). The Institute, established in 1918, is an independent research organisation under the Ministry of Agriculture and Forestry. It produces research-based information on the forest environment, multiple use of forests, forestry practices and the forest industry. It is Europe's largest forest research institute and has a permanent staff of 750, of whom 220 are researchers.
